

Potential Critical Contingency Termination

Date:	11 April 2018
Time:	08:30
Notice Number:	CC-0043
Notice Type:	Termination of Potential Critical Contingency
Notice Issued to:	First Gas TSO
Notice Copied to:	Stakeholders listed in Information Guide
Current Status:	<p>The CCO has determined that the Potential Critical Contingency situation can be terminated.</p> <p>Neither the Oaonui or Kupe Production Stations have re-commenced flowing, however supply has exceeded demand overnight and the system has recovered. The Kapuni Gas Treatment Plant pressure threshold is no longer at risk.</p> <p>It should be noted however that while linepack levels on the Maui pipeline have recovered, the system remains vulnerable to any further unplanned production outages or sudden increases in demand.</p>
CCO Instruction to TSO:	Issue notice of Termination of Potential Critical Contingency to Large Consumers and Retailers as soon as possible and ensure an appropriate critical notice is posted on OATIS.

This notice is issued in accordance with the General Critical Contingency Notice Conditions contained in the CCO Information Guide, CCO Communications Plan and First Gas CCMP.

The CCO will issue advice of this Notice of Termination of Potential Critical Contingency to the stakeholders listed in the CCO Information Guide and publish this notice in the public domain of the CCO web site at <http://www.cco.org.nz>
