| <b>Current Status:</b>         | <p>First Gas has taken actions to reduce the risk to gas supplies while permanent solutions are implemented. These include:</p> <ul style="list-style-type: none"> <li>• Reconfiguring the Papamoa distribution network to be supplied from the Mt Manganui delivery point.</li> <li>• Isolating the Rangiuru delivery point which has affected supply to a single consumer.</li> <li>• Reducing the pressure in the affected pipeline which supplies Te Puke delivery point as a precautionary measure. The pipeline pressure is being monitored and controlled to ensure consumers supplied from the Te Puke delivery point are not affected.</li> </ul> <p>Pipeline stabilisation works have been started at the Washer Road location where the pipeline is exposed.</p> <p>Kiwirail are on site and assessing options for moving the overturned carriages off the pipeline easement at Bell Road.</p> <p>This work appears to be going to plan. As such the current Potential Critical Contingency is being terminated.</p> |
| <b>CCO Instruction to TSO:</b> | Issue notice of Termination of Potential Critical Contingency to Large Consumers and Retailers as soon as possible and ensure an appropriate critical notice is posted on OATIS.  |
